LOOK, THINK, CHOOSE

Worksheet 2 of 5

What Comes Next? | Suggested ages 5-7

Name: _____ Date: _____

Read each question and all the choices. Circle one answer. A grown-up can read aloud; you can point or say your answer, too.

Print on US Letter at actual size, or choose Fit for A4. Use single-sided printing for activity cards. Black-and-white printing is suitable.

7. Which flying insect begins life as a water-dwelling nymph?

A. Monarch butterfly

B. Dragonfly

C. Honeybee

Tell someone how you decided, or write a few words.

8. Which jumping insect grows from a small nymph without a pupa stage?

A. Monarch butterfly

B. Grasshopper

C. Stag beetle

Tell someone how you decided, or write a few words.

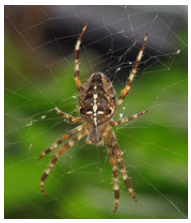

Questions 9 to 10

9. Which folded-leg insect hatches as a tiny nymph from a foamy-looking egg case?

A. Snail	B. Earthworm	C. Praying mantis
		

Tell someone how you decided, or write a few words.

10. Which colony insect's pale larvae later become pupae and then adults?

A. Spider	B. Ant	C. Millipede
		

Tell someone how you decided, or write a few words.

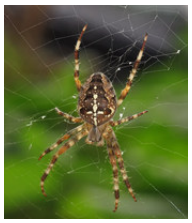

Questions 11 to 12

11. Which night-flying insect changes from a caterpillar inside a cocoon?

A. Luna moth	B. Cricket	C. Dragonfly
		

Tell someone how you decided, or write a few words.

12. Which insect grows from a grub into an adult with hard wing covers?

A. Stag beetle	B. Pill bug	C. Spider
		

Tell someone how you decided, or write a few words.

ANSWER GUIDE

For the grown-up

What Comes Next? | Suggested ages 5-7

Keep this page separate from the child's activity. Read directions aloud when helpful, and invite the child to explain their ideas.

7. B - Dragonfly

A dragonfly nymph lives underwater before changing into a winged adult.

8. B - Grasshopper

A grasshopper nymph molts as it grows and gradually develops adult wings.

9. C - Praying mantis

Young mantises hatch from an egg case called an ootheca.

10. B - Ant

Ants develop through egg, larva, pupa, and adult stages.

11. A - Luna moth

A luna moth's caterpillar makes a cocoon around its pupa.

12. A - Stag beetle

A stag beetle grub becomes a pupa before emerging as an adult.

Keep exploring

Choose a printable question set. Talk about how you found each answer, then make up one question together.
